

## About Us

### Welcome to Delta Controls!

At Delta Controls we pride ourselves in putting the customer at the forefront of all that we do. With native BACnet HVAC, Access and Lighting control products and systems that lead the industry, Delta delivers the best experience to the customer, be it the Delta Partner, the end user or the facility occupant.

Our business commitment to you our valued customers is **Do it right**. We deliver the world's first fully integrated native BACnet building automated control solution. Many companies claim the delivery of facilities management solutions. Delta differentiates itself from the competition by providing these solutions in a **Simplified** style.

For the building owner, we deliver seamless HVAC, Access and Lighting products, single source responsibility and service, and a lower install and operational cost.

For the building operator, we deliver single seat operation and the need to know one system resulting in ease of management and manpower optimization.

For the Delta network of independent distributors, the Delta Partnership, we deliver a powerful integrated solution, standardized training and installation procedures, and a flexible cost effective solution to present to all vertical segments of the global marketplace.

Delta is deliberately expanding its business worldwide and currently enjoys Partner relationships in over 40 countries on six continents. Our project list is equally as impressive with high profile sites around the world.

Thank you for visiting Delta's website. Should you have a need for additional information please utilize the contact information provided and we will be pleased to assist you.

*Welcome to Delta Controls—the world leader in Simplified BACnet integration and Satisfied Customers.*
